

Product Name: Pinned
Team Name: Pinned Team
End Sprint: 11/19/17
Revision Number: 1
Revision Date: 11/05/17

Goal

Our goal for the third sprint is to add functionality based on the user that is logged in and personalisation according to preferences on user profiles, the map, event creation, etc. Additionally, to further improve user safety/experience, we would like to create more links between users (searching, viewing, rating, inviting).

Task Listing

1. **[13]** As a user who maintains many social networking accounts, I want to be able to login with Google or Facebook, so that when I login all my details will be stored for future logins.
 - a. Finish login with Facebook (3-4h)
 - b. Finish login with Google (3-4h)
 - c. Store user details from login onto database (4-5h)
 - d. Functionality of joining events as a logged in user (2-3h)
 - e. Functionality of viewing logged in user's profile (2-3h)
 - f. Functionality of filter the map using the logged in user's preferences (2-3h)
 - g. Functionality of keeping a user logged in every time they visit the website (2-3h)
2. **[5]** As a user who only wants to view relevant events, I don't want to see finished events on the map.
 - a. Adjust frontend and backend for finished events to be removed (5-6h)
3. **[5]** As a user I want to be able to make changes to my profile, save them, and search for other users easily
 - a. Connect user profile page to backend and database (4-5h)
 - b. Add user search bar to frontend (3-4h)
 - c. Link search bar and add functionality in the backend (4-5h)
 - d. Create mockup for user search results (3-4h)
 - e. Add search results based on mockup (4-5h)
4. **[8]** As a user who values a quality experience, I want to be able to rate users according to reliability, experience, etc.
 - a. Create a mockup for user rating form (2-3h)
 - b. Create the form from the mockup (4-5h)
 - c. Make changes to backend and model to include ratings (3-4h)
 - d. Link the form to the backend (3-4h)
 - e. Make the form appear at the right time (when an event a user has joined is over) (4-5h)

Sprint Backlog:

[8] As a user who only wants to play with my own friends, I want to be able to create “private events” and share them with selected people.

- Make changes to the backend and model to include private events (3-4h)
- Add functionality in backend to distinguish between public and private events (3-4h)
- Choose between public/private upon event creation (2-3h)
- Functionality to invite other users (4-5h)
- Add private/public filter to map (3-4h)

Team Roles

Lorenzo: Back-end developer (Product Owner)

Henry: Front-end developer (Scrum Master)

Andrea: Front-end developer

Mattheo: Back-end developer

Alessia: Back-end and front-end developer

Initial Task Assignment

Lorenzo: 1.a, 1.b

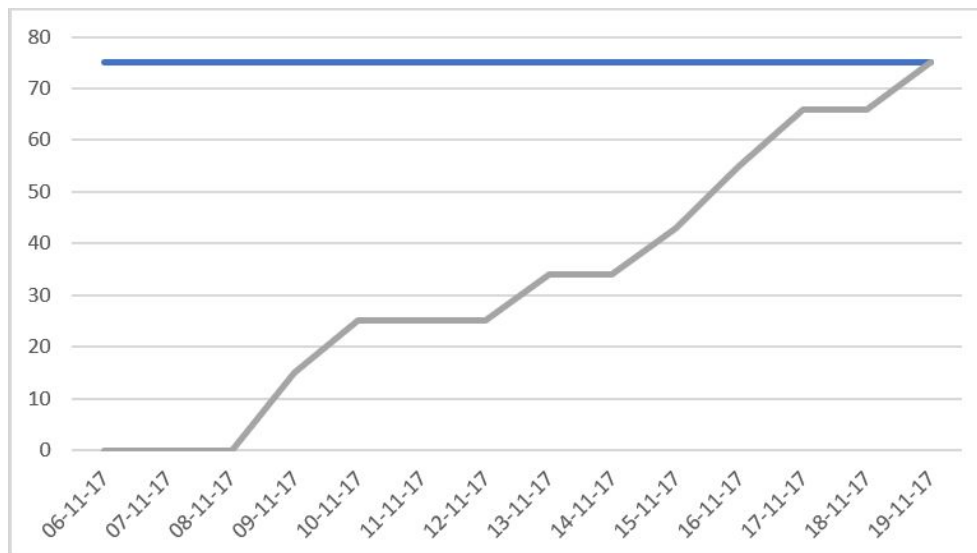

Henry: 1.a, 1.b

Andrea: 1.a, 1.b

Mattheo: 1.a, 1.b

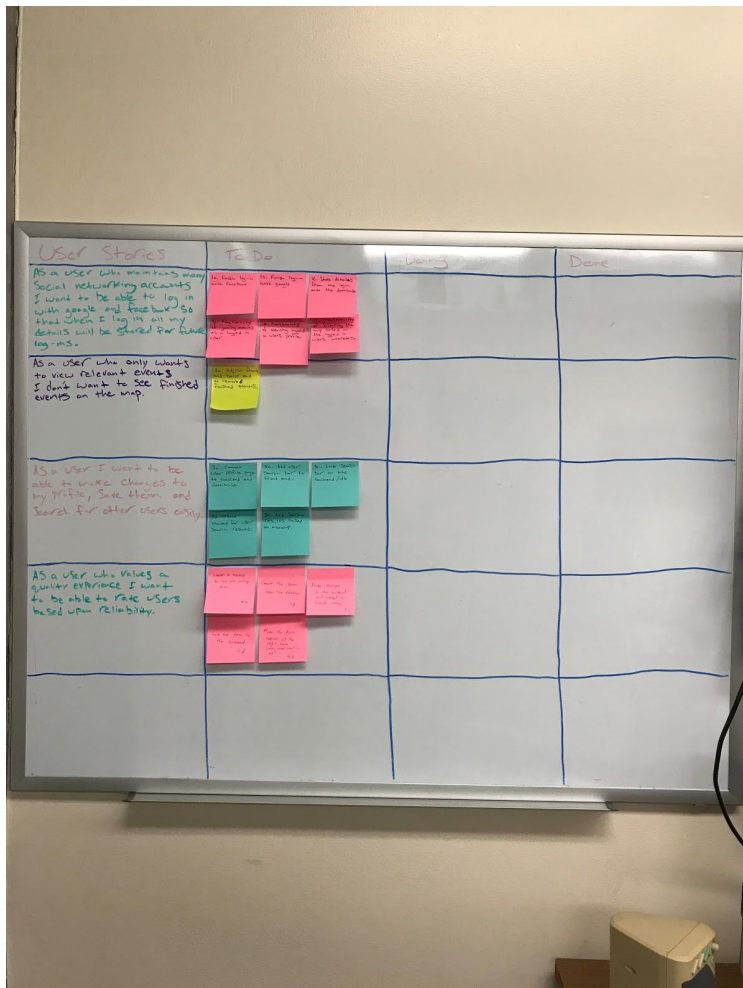

Alessia: 1.a, 1.b
